

EPC & TURNKEY PROJECTS

As part of the Bilfinger group, we are in a position to perform integrated plant engineering projects for you. From concept, basic and detail engineering to implementation and start-up.

Bilfinger Peters Engineering GmbH handles and coordinates all activities for you. We rely on our Bilfinger affiliates and undertake, in addition to engineering, process engineering and E & I installation, pipe and steelwork manufacturing, scaffolding and insulation for all areas as well. If you need support from other external disciplines, we will also procure and coordinate them for you.

The Complete Solution

As our client, your main advantage is the optimized interface-management within the Bilfinger group. We undertake for you the bundle plant engineering, manufacturing and subsequent assembly of pipes, machines & equipment as well as automation for you. Upon request, we also support your plant start-up procedures.

Included Procurement

Moreover, we are capable of handling the complete procurement management and all additional required disciplines (insulation, steelwork, reinforced concrete construction). Rounding out your plant life-cycle, we also provide maintenance and recurring inspections.

EPC – Engineering, Procurement and Construction

Bilfinger Peters Engineering GmbH provides the following services:

- Concept, basic and detail design and planning
- Overall project management from the beginning to finish
- Scaffolding
- Pipe manufacturing
- Steelwork manufacturing
- Insulation technology
- E&I planning and installation
- Process Engineering assembly
- Procurement for all disciplines
- Start-up

Finally, you may assign Bilfinger to carry out the maintenance of your plant.

your advantage

- cost saving and time efficient, as the largest portion of work comes directly from Bilfinger
- few external interfaces ensure a high level of quality
- minimized risk by assigning to just one or to few contractors
- transparency and flexibility
- meeting your timeframe and cost schedules
